

# Stepper Motor Programming Package – Tabletop Mechatronics

45058

Stepper Motor Programming Software

## Technical Data

Complete technical specifications available upon request.

**In-Line USB converter**  
**USB cable**  
**Stepper Motor Programming Software CD**  
**Install Guide (D25041)**  
**Supplemental Disc (S25041)**

### Additional Requirements:

Tabletop Mechatronics Station #2 – Inspecting and Indexing (87-TMS2)

### Utilities:

None

Amatrol's Stepper Motor Programming Package for Tabletop Mechatronics (45058) features an in-line USB converter that learners will install on the Tabletop Mechatronics Station #2 – Inspecting and Indexing (87-TMS2) to provide the ability to program the 87-TMS2's stepper motor. Using this package, learners will be able to change basic stepper motor settings such as the acceleration or deceleration of the motor, which are real-world applications. In addition to the in-line USB converter, the 45058 includes a USB cable, stepper motor programming software CD, an install guide, and a supplemental disc.
