

Simulator Adoption Made Easy with CM Labs' SimGuide Service

CM Labs' SimGuide Service is designed to simplify the integration of your new simulator. We'll guide you throughout the process of setting up and implementing your simulator, no matter what your objective:

Developing a training program for the first time

Embedding simulation into an existing training program

Using simulation for operator cross-training

Using simulators to recruit and assess new operators

With the SimGuide Service, you get a complete road map that details how and when you should use your simulator to meet your targets.

Guidance at Every Step

The SimGuide Service is for companies at any stage of simulator adoption, whether developing a simulation-based training program for the first time, or extending the use of existing their CM Labs simulators.

We tailor the SimGuide Service to meet your needs. Led by our Subject Matter Experts with over 20 years industry experience, you can count on CM Labs to deliver the very best validation and training support.

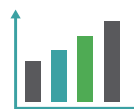

Previewing training programs to see where simulation fits

Helping your organisation adapt to changes associated with simulation technology

Helping to develop a full “learning path” and structured training processes to ensure expected outcomes

Assisting in quantifying and measuring the progress of your overall simulation strategy

Simulation is a highly flexible technology – and while every company is different, we have implemented simulation solutions for hundreds of clients at over 1,000 sites worldwide. Let us guide to get the maximum benefit out of your simulator initiatives. Contact us today to find out how.
